1 Introduction

The following analyses are based on all patients with established rheumatoid arthritis (etablerad RA), defined as having been diagnosed with RA at least 12 months before the start of the measurement period (i.e. each year).

2 Process

In this section, the process of evaluating established patients each year is evaluated. We have analyzed all patients with established RA as defined above.

In this section

2.1	Percentage of patients with at least one VAS pain value (goal $\geq 90\%$), by unit and year.	3
2.2	Percentage of patients with at least one HAQ value (goal $\geq 90\%$), by unit and year.	4
